### TESTIMONIAL

**I have proof that the Oil Transfer System does what it's supposed to....IT WORKS!**

**We can filter and recycle hydraulic oil in our loaders, dump trucks, graders and garbage packers...some twenty units in all, each with 30 to 45-gallon capacity. With oil at say, \$7.50 a gallon, it more than paid for itself the first time I did all the units! It's fast, easy to use, and the filters last a long time.**

**With equipment now having such close tolerance in their hydraulic and transmission systems, it makes sense to filter even your new oils because down time and repairs are so costly.**

**I am achieving an ISO count of 16/13 easily...reducing the 5 micron particle count from over 6,000 to less than 600 per milliliter – and that's on brand new oil!**

**The Oil Transfer System has made a believer out of me!**
