

## Worlds First & Finest, Affordable, Scrubber - Recycle System

- ◆ Heavy contamination in new bulk oils can reduce equipment life up to nine times
- ◆ Remove millions of harmful sized sand particles (dirt) per each gallon of oil, up to 128X cleaner than new bulk oils
- ◆ 500 hour used engine oils can easily be cleaner than current new oils filling an oil rack
- ◆ 500 to 1000 hr engine oil change intervals with LaserNet Fines testing, additive package not depleted (Condition Monitoring ISO code oil analysis)
- ◆ Recycle most oils (hyd), quickly easily, and inexpensively; 20,000 hrs + (with no ill effect)
- ◆ Reduce overall US oil consumption by 60 + %
- ◆ Save Thousand\$ yearly - can have instant payback
- ◆ Handle 1 or 100 different type oils, no cross contamination with pin filter assemblies
- ◆ Easily adaptable for your current needs, changeable for all future needs
- ◆ Always use LazerNet labs, inexpensively and quickly verify oil quality (ISO Code, etc)
- ◆ Digital meter with pre-filter wire cloth collection pan
- ◆ Reduce oil change time by 50%
- ◆ In general, Caterpillar promotes the cleaning of all new oils & clean their own.

COMP-4 System -Front & rear view of 27-gallon tank, one per system

Four filter assemblies with gauges, labeled for any oils you wish  
Two of which are interchangeable pin filter assemblies

US Patents # 6,022,473 and # 6,630,091

With unbeatable results, apply one or all of these applications with a single, easy to operate system.
