Doug,

We purchased a scrubber cart from Oil Transfer Systems a few years ago and find it to be an invaluable item in our shops, saving about \$15,000 annually by recycling hydraulic fluid on our rolling equipment, as well as our stationary equipment and even compressor oil, with no need or bother to dispose of old oils.

The system is very well designed and built, capable of being used on multiple oils with long lasting filters, and is fast and easy to use. We did and continue to have good follow up from the inventor.

This piece of equipment is a great value to us here at Mid America Steel.
