Worlds Finest, Affordable, Scrubber & Recycle System

- ◆ New oil is contaminated to a level not suitable for today's equipments
- ◆ Remove millions of harmful sized sand particles (dirt) per each gallon of oil
- ◆ Recycle most oils, quickly easily, and inexpensively; 15,000 hrs + (with no ill effect)
- ◆ Instant payback
- ◆ Nearly stop wear on hydraulic systems and servo valves
- ◆ Nearly stop wear on your engines and transmissions
- ◆ 500 hr used engine oils can be cleaner than current new oils
- ◆ 500 to 800 hr engine oil change intervals with LaserNet Fines testing (ISO code oil analysis)
- ◆ Save thousands every year
- ◆ Handle 1 or 100 different oils, no cross contamination with pin filter assemblies
- ◆ Easily adaptable for your current needs, changeable for your future needs
- ◆ Always use oil analysis labs, inexpensively and quickly verify oil quality (ISO Code, etc)
- ◆ Digital meter and one of a kind wire cloth collection pan
- ◆ **Reduce oil change time by 50%**
Apply one or all of these applications with a single, easy to operate system.

COMP-4 System -Front & rear view of 27-gallon tank, one per system

Four filter assemblies with gauges, labeled for any oils you wish
Two of which are interchangeable pin filter assemblies

US Patents # 6,022,473 and # 6,630,091
